WMC200 dNF40

Nanofiltration membrane module for water and wastewater applications

Product description

The WMC200 dNF40 nanofiltration modules have the following features:

- Use for treatment of ground and surface water; reuse of industrial and municipal wastewater effluents
- Excellent removal of color, turbidity, divalent ions and dissolved organics, including micropollutants
- Inside-out operation in a cross-flow filtration mode, backwashable
- Limited pretreatment required, no coagulation and no sludge production
- Vertical mounting in a skid
- Excellent pH and chlorine tolerance
